

Meetings 5 and 6

This is the summary of the meetings held with representatives from institutes B and C. The table summarizes the purposes, main topics discussed, and outputs of the meetings.

Fifth and sixth meetings	
Stakeholders	Institute B; representative B2. Institute C; representative C1 and C2.
Topics of discussion	Terminology on climate, climate change, agriculture, and agriplastics
Take-home messages	• Identification of terms to prioritize. • Lexical revisions of proposed vocabulary. • Suggestions over term characterizations.
Framework of reference on sustainability, plastics, and climate change	XXXX
Agriculture system of reference	Agricultural systems, in particular apple orchards in South Tyrol (Italy). Relevant supply chain: from apple tree planting to apple harvesting and preparation for selling.
Data of reference	To further discuss later when the project is more advanced.
Relevant projects	XXXX

See below the list of terms provided to stakeholders:

- aeration agricultural soil pore obstruction process by agripastic debris
- agricultural drainage plastic pipe
- agricultural field
- agricultural high-tunnel film
- agricultural irrigation plastic tube
- agricultural low-tunnel film
- agricultural plant plastic bag
- agricultural plant protection plastic tube
- agricultural plastic net
- agricultural plastic pot

- agricultural reflective film
- agricultural soil microbe activity
- agricultural soil microbe colonisation process of agriplastic debris
- agricultural soil microbial composition
- agricultural soil microbial diversity
- agricultural soil nutrient cycling impediment process
- agricultural system
- agriplastic debris interfering process with farm machinery operations
- agriplastic debris particle
- agriplastic debris-driven cell oxidative stress process
- agriplastic debris-driven process of animal failure to reproduce
- agriplastic degradation
- agriplastic degradation in agriculture
- agriplastic disposal
- agriplastic fragmentation
- agriplastic fragmentation in agriculture
- agriplastic object
- agriplastic transportation process in agriculture
- agriplastic usage process in agriculture
- agriplastics-driven sunlight radiation blocking process in agriculture
- airborne plastic deposition
- alteration process of temperature
- alteration process of UV radiation
- animal and plant harm process by agriplastics or related debris
- animal entanglement process with agriplastics in apple orchards
- animal entrapment with agriplastics in apple orchards
- animal ingestion of agriplastic debris
- animal inhalation of agriplastic debris aerosol
- apple
- apple farmer
- apple orchard
- apple packaging
- apple production process
- apple production system
- apple storing
- apple tree
- apple tree uptake process of microplastic debris
- atmosphere
- atmospheric process
- atmospheric weather
- bacterial colonization of agricultural soil debris particle
- bacterial colonization of soil plastic debris particle
- bale knitted plastic net
- bale plastic net-wrap

- bale plastic wrap film
- biofilm formation process on agriplastic debris in agriculture
- blockage process of the animal's intestinal tract
- carbon cycling process
- carbon stock
- carbon storage process
- catastrophic storm
- climate
- climate change
- climate system
- climate system component
- climate system process
- climate variability - measurement
- climate variability - process profile
- CO₂ sink
- dissolved organic carbon
- emission process of aerosols
- emission process of CO₂
- emission process of greenhouse gas
- emission process of non-CO₂ greenhouse gas
- emission process of ozone-depleting substances
- emission process of tropospheric ozone precursors
- flood
- GHG emission
- GHG emission process
- GHG emission process from plastics in agriculture
- GHG emission process in agriculture
- greenhouse effect
- greenhouse film
- human ingestion of agriplastic debris
- human inhalation of agriplastic debris aerosol
- inhibition process of animal gastric enzyme secretion
- intense drought
- microbial respiration process
- mulching film
- nitrogen cycling process
- ocean acidification process
- orchard agriplastic alteration process of agricultural soil properties
- orchard agriplastic alteration process of agricultural soil structure
- plastic aerosol
- plastic binding for agricultural plant growth and training
- plastic debris accumulation in organism
- plastic debris tropic transfer process
- plastic debris-driven alteration process of agricultural soil microbe composition

- plastic debris-driven alteration process of agricultural soil microbe metabolism
- plastic debris-driven alteration process of agricultural soil microbial biomass
- plastic debris-driven alteration process of soil pH
- plastic debris-driven alteration process of soil porosity
- plastic debris-driven alteration process of soil structure
- plastic debris-driven process of increasing soil aeration
- plastic debris-driven soil CH₄ emission process
- plastic debris-driven soil N₂O emission process
- plastic debris-induced alteration process of apple tree growth rate
- plastic debris-induced ecotoxicity
- plastic debris-induced GHG emission process
- plastic film for the early agricultural plant growth stage protection
- plastic net for agricultural harvest
- plastic net for animal protection in agriculture
- plastic net for hail protection in agriculture
- plastic pollution in agriculture
- plastic usage in apple orchard
- plastic usage process for apple tree protection
- plastic usage process for extending apple tree seasonality
- plastic usage process in apple tree growth and management
- plastic usage process to reduce water demand in apple production
- precipitation process
- process of alteration in species types
- process of decrease in agricultural soil enzyme activity
- process of decrease in animal steroid hormone levels
- process of decrease of CO₂ gas emission from soil
- process of delays in animal ovulation
- process of increase in agricultural soil enzyme activity
- process of increase in atmospheric CO₂ and CO₂-equivalent concentration
- process of increase in CO₂ gas emission from soil
- process of increase in soil surface temperature
- process of increase in UV irradiation
- process of increase in weed and crop competition
- process of increase of agricultural soil water availability
- process of increase of temperature
- process of increasing agricultural plant photosynthetic responses
- process of increasing agricultural soil microbe biomass
- process of increasing water scarcity
- process of reducing agriplastic usage in agriculture
- reduction process of animal feeding stimuli
- release process of agriplastic debris-carried pollutants
- release process of CO₂ gas emission from plastic debris degradation process
- release process of CO₂ gas emission from plastic degradation process
- season

- seasonality
- silage plastic net
- silage film
- soil carbon sequestration process
- soil CH₄ emission process
- soil erosion
- soil N₂O emission process
- soil organic carbon
- soil organic carbon in agricultural soil
- soil porosity
- solar radiation
- surface temperature
- temperature
- transfer process of human pathogens to apple trees in agriculture
- UV irradiation process
- warming
- water cycling process
- wildfire
